## DVDs

1. Parish Nursing: *Beyond Four Walls*. Health Ministry in the Congregation.

"Beyond Four Walls" brings to the clergy and congregational leadership an overview of the dynamics of faith in action within the context of health ministry and parish nursing. Scripture records the messages that belief and faith bring healing and wholeness. Health ministry and parish nursing are tools which bring the elements of physical, mental emotional and spiritual health into focus, making activities vital and ministry relevant for today. Following the example of Christ's ministry of healing, and understanding the principals of whole person health, the congregation can develop a vibrant ministry for health and wholeness. In partnership with community healthcare entities, congregations can apply wholistic health promotion and disease prevention across the age span of the congregation, and reach out to care for those in need in the community.

(While the focus of this film is parish nursing, it is a good overview of health ministry in general as carried out in the local church. Several clergy from various denominations speak on the film. Please keep in mind that parish nurses can be paid or volunteer. To view a good part of this film go to <https://www.youtube.com/watch?v=FzQCl7qJX0g>.)
